The global Radiant Tube Gas Heaters market size is predicted to grow from US\$ 259 million in 2025 to US\$ 377 million in 2031; it is expected to grow at a CAGR of 6.5% from 2025 to 2031.

Radiant tube heaters are gas-fired infrared heating devices and rank among the group of decentralized heating systems. As opposed to central heating systems, they are characterised by the fact that their heat is precisely generated at the place where it is needed (warehouse, workplace, production etc.). A radiant tube heater outputs infrared radiation via its long dark radiant tubes.

Global core radiant tube gas heaters manufacturers include Schwan, Detroit Radiant Products, Roberts Gordon etc. The top 5 companies hold a share about 40%. North America is the largest market, with a share about 36%, followed by Europe and Asia Pacific with the share about 35% and 22%. In terms of product, u-type radiant tube heaters is the largest segment, with a share about 55%. And in terms of application, the largest application is industrial, followed by commercial.
