Radiation proof glass refers to the glass with protection against x-rays ? Special glass with radioactive ray function such as X-ray. Radiation proof glass is generally high lead glass, which is mainly used in places where radiation protection and radiation protection are required, such as protective appliances or observation windows for radiation medicine, observation windows for nuclear industry, etc. Radiation resistant glass refers to a special optical glass, also known as stabilized glass, whose transmissivity decreases slightly and discoloration is not serious under the influence of large doses of excited photons and particles. This paper mainly studies radiation resistant and radiation proof glass.
