The global Radio Frequency (RF) Testing and Certification Services market size is predicted to grow from US\$ 2426 million in 2025 to US\$ 3523 million in 2032; it is expected to grow at a CAGR of 5.5% from 2026 to 2032.

Radio Frequency (RF) Testing and Certification Services refer to professional third-party technical services focusing on wireless electronic products, which conduct systematic inspection, parameter verification and compliance evaluation targeting radio frequency performance, electromagnetic characteristics, signal transmission and radiation indicators. Carried out in strict accordance with national regulations, regional access rules and international industry standards, these services cover RF emission, receiver sensitivity, frequency accuracy, electromagnetic interference, radio spectrum management and human body radiation safety. Service providers complete laboratory testing, data sorting, document auditing and formal certification procedures, and issue legally valid test reports and certification documents. These services are indispensable links for wireless products to enter domestic and overseas markets, guarantee product operational safety and technical compliance, and serve product developers, manufacturers, export enterprises, brand operators and related research institutions across the electronic industry chain.

Driven by the iteration of 5G, Wi-Fi 7, Bluetooth and other wireless technologies, the radio frequency (RF) testing and certification industry is moving toward intelligent testing, digital management and unified cross-regional standard coordination; the rapid expansion of IoT devices, smart terminals, automotive electronics and cross-border electronic trade brings steady growth in service demand and broad market opportunities, while the industry also faces challenges including fragmented regional

certification standards, fast product update cycles, rising laboratory operation and certification costs, fierce homogeneous competition, and continuous pressure to upgrade testing capabilities to match emerging wireless technologies.
