The ?Railway Digital Track Gauge is a high-precision, portable inspection tool used to measure the geometric dimensions of railway lines. It uses microelectronics, embedded, sensor and other technologies to directly read measured values ??such as track gauge, superelevation, inspection interval and back guard distance of the railway line through the OLED display. Railway digital track gauge is suitable for the detection of various railway lines. According to the different measurement speed, it is divided into three levels: level 0, level 1 and level 2. Level 0 gauge ruler is used to measure railway lines where the allowable speed does not exceed 350km/h, Level 1 is used for measurements below 250km/h, and Level 2 is used for measurements below 160km/h.

United States market for Railway Digital Track Gauge is estimated to increase from US$ million in 2024 to US$ million by 2031, at a CAGR of % from 2025 through 2031.
