The global Readily Biodegradable Corrosion Inhibitors market size is predicted to grow from US\$ 1164 million in 2025 to US\$ 2379 million in 2032; it is expected to grow at a CAGR of 10.8% from 2026 to 2032.

In 2024, global readily biodegradable corrosion inhibitors production reached approximately 201,637 ton, with an average global market price of around USD 5,900 per ton. A factory gross profit of USD 1,593 per ton with 27% gross margin. A single line full machine capacity production is around 1,800 ton per line per year. downstream demand is concentrated in oil & gas, water treatment, marine and infrastructures. A municipal water authority integrates biodegradable corrosion inhibitors into its cooling water loops to prevent pipe and heat exchanger degradation, reduce maintenance interval and reduce chemical effluent toxicity. Readily biodegradable corrosion inhibitors are eco-friendly chemicals, often derived from natural sources like plants (phytochemicals, plant extracts) or biowaste, and synthetic biodegradable polymers (like PLA, PVA, PEG), that protect metals from corrosion but break down easily in the environment, minimizing pollution, unlike traditional harsh inhibitors. They work by adsorbing onto metal surfaces, forming protective films, and are used across industries as sustainable alternatives to conventional chemical treatments, offering high effectiveness with low environmental impact.

United States market for Readily Biodegradable Corrosion Inhibitors is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.
