The global Rear Loader Compression Garbage Truck market size is predicted to grow from US$ 878 million in 2025 to US$ 1366 million in 2032; it is expected to grow at a CAGR of 6.6% from 2026 to 2032.

Global sales of rear loader compression garbage trucks in 2024 were expected to reach approximately 25,600 units, with an average price of approximately $33,000 and a typical gross profit margin of 19%. These vehicles utilize a one-piece floorpan, fully sealed welds, a double-layer impermeable liner, and hydraulic sealing valves to prevent leakage of leachate and sewage during collection, transportation, and disposal, effectively reducing secondary pollution and environmental damage to roads. These vehicles are particularly widely used in the collection and transportation of municipal solid waste, food waste, and wet garbage, and have gradually become the mainstream standard model for sanitation procurement in first-tier cities. The upstream process primarily relies on specialty steel plates, hydraulic systems, sealing strips, and transmission assemblies; downstream customers are primarily municipal sanitation departments, large sanitation operators, and municipal waste disposal companies. Mack Trucks has an annual production capacity of approximately 2,800 units, primarily supplying North American municipalities and waste management companies.
