Cordless power tools are a class of tools and equipment that use batteries or accumulators as a power source and are used for a variety of construction, manufacturing and repair tasks. These tools charge via rechargeable batteries rather than relying on traditional fuel power. Rechargeable power tools are widely used in many fields including construction sites, home maintenance, manufacturing, agriculture, gardening and car repair. Common rechargeable power tools include electric drills, electric hammers, saws, angle grinders, impact wrenches, electric lawn mowers, electric chain saws, etc. One of the future development trends is to increase the capacity of rechargeable power tool batteries to extend the use time of the tool. This will allow the tool to complete more tasks on a single charge.
