Cardboard packaging companies need to actively take environmental protection measures and promote environmental protection technologies and concepts to comply with national policies and social needs.

The rise of the e-commerce industry has also had a significant impact on the growth of the paper and paperboard packaging market. Corrugated packaging is often used by e-commerce companies for secondary and tertiary packaging due to its light weight and low cost. In addition, the growing sustainability issues of plastic materials are prompting e-commerce companies to replace flexible plastic packaging with paper packaging,

which is expected to boost the paper and paperboard industry.

The cardboard packaging industry is an industry with closely linked upstream and downstream industries, and the synergy of the supply chain has an important impact on the development of the market. Optimization of the supply chain can reduce production costs, improve product quality, and improve service levels, thereby increasing market competitiveness.
