Flexographic Reel to reel printing machine, also known as flexo printers, are a type of printing machine that uses a flexible printing plate to transfer ink onto the surface of the material being printed. Flexographic printing is a popular choice for printing on a wide range of materials, including plastics, paper, and cardboard. It is particularly well-suited for printing on PP woven sacks due to the durability and flexibility of the printing plate,

which allows for high-quality printing results even on irregular or uneven surfaces. One of the main advantages of flexographic printing is the ability to print high-resolution graphics and text with a wide range of colors. The printing plate is made from a durable material that can be etched with a detailed design, allowing for precise and accurate printing results. Flexo printers are also known for their speed and efficiency, making them a cost-effective option for high-volume printing applications.
