Reflective safety tape, also known as reflective tape or reflective adhesive tape, is a type of tape designed to enhance visibility and safety in low-light or nighttime conditions. It is commonly used in various industries and applications to improve the visibility of vehicles, equipment, clothing, and other objects to prevent accidents and ensure safety.

Reflective safety tape is made of a material that contains tiny glass beads or prismatic lenses. These materials reflect light, making the tape highly visible when exposed to a light source, such as headlights or flashlights. Reflective safety tape provides high visibility in low-light conditions, darkness, or adverse weather conditions. It helps objects or surfaces stand out to alert drivers, workers, or pedestrians to their presence. The tape typically has an adhesive backing, allowing it to be easily applied to a variety of

surfaces, including vehicles, signs, barriers, clothing, helmets, and equipment. Reflective safety tape is used in a wide range of applications, including road signs, traffic cones, vehicles (cars, trucks, bicycles, motorcycles), construction equipment, emergency vehicles, safety vests, helmets, gates, barricades, and more.
