Reflow oven cleaner refers to a cleaning agent or solution specifically formulated for removing residues, fluxes, and other contaminants from reflow soldering ovens. Reflow soldering ovens are used in electronic manufacturing processes to heat and melt solder paste, forming electrical connections between components on PCBs. Over time, flux residues and contaminants may build up in the oven, affecting its performance and potentially compromising the quality of solder joints. Reflow oven cleaner is designed to effectively dissolve and remove these residues, ensuring proper functioning of the oven and maintaining soldering quality. The cleaner may be in the form of a liquid, foam, or paste, and can be applied using appropriate cleaning tools or methods. It is important to ensure that the reflow oven cleaner is compatible with the oven material and components, and to follow the manufacturer's instructions for safe and effective usage.
