Abstracts

The global Refurbished Laptops and Desktops market size is predicted to grow from US$ 9901 million in 2025 to US$ 16560 million in 2031; it is expected to grow at a CAGR of 9.0% from 2025 to 2031.

Refurbished laptop and desktop are the process of restoring used or re-owned computer equipment, including laptops and desktops, to like-new condition. This process may involve repairing or replacing any defective or damaged components, cleaning and reassembling the equipment, and installing necessary software and updates to ensure that the equipment performs and looks like a new device.

In recent years, with consumers' increasing awareness of environmental protection and pursuit of cost-effectiveness, the market size of refurbished laptop and desktop computer services has continued to expand. In terms of regional distribution, Europe is one of the world's largest refurbished computer markets, with a market share of more than 35% (or 41%, slightly different according to different data sources). The Asian and North American markets follow closely behind, each occupying a large market share. In the Chinese market, with consumers' dual pursuit of environmental protection and cost-effectiveness, as well as their increasing attention to brand credibility, the refurbished computer market has also ushered in a broader development space.

LPI (LP Information)' newest research report, the “Refurbished Laptops and Desktops Industry Forecast” looks at past sales and reviews total world Refurbished Laptops and Desktops sales in 2024, providing a comprehensive analysis by region and market sector of projected Refurbished Laptops and Desktops sales for 2025 through 2031. With Refurbished Laptops and Desktops sales broken down by region, market sector and sub-sector, this report provides a detailed analysis in US$ millions of the world
