The global Reinforcing Agents for Synthetic Rubber market size is predicted to grow from US\$ 704 million in 2025 to US\$ 953 million in 2032; it is expected to grow at a CAGR of 4.5% from 2026 to 2032.

Carbon black and silica are currently the most widely used reinforcing fillers in the rubber industry.

Plastic additives, also known as plastic additives, are some compounds that must be added to improve the processing performance of polymers (synthetic resins) or to improve the performance of the resin itself when it is molded. Plastic additives is an associated industry of the plastics industry, and its development level is closely related to the development of the plastics industry. At present, the world's enterprises engaged in the production of plastic additives are distributed in Asia, Europe, the United States and other continents. Due to their strong financial strength, broad technology, and long time in related industries, large international manufacturers are mostly engaged in the production of various plastic additives. The chain is longer, and the production of high-end plastic additives accounts for a large proportion. Due to the low cost of labor in Asia and the huge market size, the world's plastic additives industry has gradually shifted to Asia, and Asia, especially China, has gathered most of the manufacturers. Therefore, China has played an important role in the rapid growth of plastic additives in recent years, becoming the largest and fastest growing market in the world. In recent years, with the wide application of plastics, the global plastic additives industry has achieved rapid growth. In the past few years, the demand for plastic additives in the world has continued to grow at an average annual rate of about 3-4%. The average annual growth rate of demand in Europe, North America and Asia Pacific (excluding China) is 3%. The average annual growth rate of plastic additives in China The growth rate is as high as

8%-10%, and the average annual growth rate of demand in other regions is 5%-6%. It is predicted that in the next period of time, the plastic additives market will still grow at a rate of 3%-4%.
