The global Release Paper for PVC Leather market size is predicted to grow from US\$ 268 million in 2025 to US\$ 358 million in 2032; it is expected to grow at a CAGR of 4.1% from 2026 to 2032.

PVC leather, or polyvinyl chloride leather, is a synthetic material designed to resemble natural leather. It is made by applying a PVC coating to a fabric base, typically polyester or cotton, to create a durable, water-resistant surface. PVC leather is commonly used in furniture, automotive interiors, clothing, and accessories due to its low cost, ease of maintenance, and versatile applications. While it is durable and resistant to wear and tear, PVC leather lacks the breathability and flexibility of natural leather or other synthetic alternatives like PU leather. It is also less environmentally friendly due to the chemicals involved in its production. In 2025, global Release Paper for PVC Leather production reached approximately 288 kilotons, with an average global market price of around 950 US\$/Ton. The production capacity of Release Paper for PVC Leather reaches 360 kilotons, and the industry's gross profit margin is approximately between 10% and 20%.

Driving factors in the release paper for PVC leather market include the large, still-growing base of PVC synthetic leather applications in footwear, luggage, furniture, automotive interiors, stationery and low- to mid-end fashion, where PVC remains attractive for its low cost, good abrasion resistance and easy processing. Brand owners and converters are pushing for richer textures, gloss levels and special surface effects (embossing, matte, high-gloss, pearlescent, textile-like grains), which depend directly on the quality and precision of release paper to replicate patterns consistently across high-volume calendaring and coating lines. At the same time, competitive pressure on PVC leather producers to improve yield, reduce defects and stabilize quality drives demand

for release papers with better dimensional stability, heat resistance, release performance and reusability.
