Removable Head Steel Drum is a type of cylindrical container made from steel, designed primarily for the storage and transportation of solids, semi-solids, and liquids. The defining feature of a removable head steel drum is its detachable lid, which provides full access to the contents inside, making it distinct from tight head (closed head) drums that have a permanently sealed top. This makes them particularly useful in industries requiring frequent access to the drum's contents, such as food processing, chemicals, pharmaceuticals, and hazardous waste management.
