Abstracts

The global Renewable Biomass Fuel market size is predicted to grow from US\$ 1327 million in 2025 to US\$ 2973 million in 2032; it is expected to grow at a CAGR of 12.4% from 2026 to 2032.

The market is well established in Europe, but it is rapidly expanding in Asia and North America. The COP21 agreement concluded in Paris has produced an immediate escalation of interest to quickly decarbonize energy production by switching from coal to biomass. UK, NL, BE, and DK have announced a full exit from coal power generation and other countries such as DE and FR have confirmed a scaling back of coal fired power generation. All of this activity heavily favors an immediate switch to Briquette.
