The global Residual Gas Analyzers (RGA) market size is predicted to grow from US\$ 317 million in 2025 to US\$ 423 million in 2031; it is expected to grow at a CAGR of 4.9% from 2025 to 2031.

The residual gas analyzer actually ionizes separate components of the gas to create various ions, and then detects and determines the mass-to-charge ratios. This process works better in vacuum, where quality is easier to monitor and impurities and inconsistencies are easier to detect because of the low pressure.

The key global manufacturers of residual gas analyzers (RGAs) include Inficon, ULVAC, and Stanford Research Systems (SRS). The top three global manufacturers together hold about 60% of the market share, with the largest manufacturer being Inficon, accounting for 28%. Global origins are mainly located in North America, Europe, China, Japan and South Korea. In terms of product type, 1-100 amu is the largest segment, with a market share of about 47%. In terms of application, the largest application is industrial applications, with a share of about 74%.
