## Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

Resorbable Collagen Dental Membranes consist of either type I or type III collagen from bovine or porcine origin. Resorbable Collagen Dental Membranes are easy to manipulate and have favorable effects on coagulation and wound healing, variable cross-linking, low antigenicity and high tensile strength. Additionally, they inhibit epithelial cells, promote the attachment of connective-tissue cells, and increase platelet aggregation, which leads to wound stabilization and increased healing.
