The growth in preference for consumer-friendly packaging formats, along with the ongoing shift in preference from rigid to flexible packaging varieties, are expected to play a key role in boosting sales of retort films. One of the key factors contributing to the growth of the global retort films market, is their advantages over their counterparts such as metal cans. Retort flexible containers are able to enhance the shelf life of the product as much as a metal can. Retort films are widely used for products such as boiled & sterilized products, juices, and ketchup & mayonnaise, among others. Manufacturers of retort films focus on producing high quality microwavable retort films with high gas barrier properties, which helps in enhancing the shelf life of the content, and consumer-friendly easy tear-open features.
