A Reusable Satellite Launch Vehicle (RSLV) refers to a vehicle which can be used for several missions. Ideally, it takes off vertically on the back of an expendable rocket and then glides back down like an airplane. Small wings assist in changing the direction of the moving vehicle during landing. The main advantage of an RSLV is that it can be used multiple times with low repair and maintenance costs. A successful RSLV would undoubtedly cut down mission costs and make space travel more accessible.

The global Reusable Satellite Launch Vehicle (RSLV) market size is projected to grow from US\$ million in 2023 to US\$ million in 2030; it is expected to grow at a CAGR of % from 2024 to 2030.
