The global RF & Microwave Switches market size is predicted to grow from US\$ 4002 million in 2025 to US\$ 5886 million in 2031; it is expected to grow at a CAGR of 6.6% from 2025 to 2031.

The impact of the latest U.S. tariff measures and the corresponding policy responses from countries worldwide on market competitiveness, regional economic performance, and supply chain configurations will be comprehensively evaluated in this report.

An RF switch or microwave switch is a device to route high frequency signals through transmission paths. RF (radio frequency) and microwave switches are used extensively in microwave test systems for signal routing between instruments and devices under test (DUT). Incorporating a switch into a switch matrix system enables you to route signals from multiple instruments to single or multiple DUTs. This allows multiple tests to be performed with the same setup, eliminating the need for frequent connects and disconnects. The entire testing process can be automated, increasing the throughput in high-volume production environments.

The main manufacturers of Global RF and Microwave Switches include Skyworks, Qorvo, Murata, Infineon, etc. These top four manufacturers hold a market share about 50%. North America and Europe are the major producing regions in the world, followed by China.
