The RFID attendance system is an attendance management system based on Radio Frequency Identification (RFID) technology. It uses wireless signal transmission between RFID tags and readers to achieve rapid identification of employee identities and access control. When taking attendance, employees only need to carry a card or device with an RFID tag and bring it close to the reader to complete the attendance operation. There is no need to manually enter information, which greatly improves the efficiency and accuracy of attendance.

The global RFID Attendance System market size is projected to grow from US\$ million in 2024 to US\$ million in 2030; it is expected to grow at a CAGR of % from 2024 to 2030.
