The global RFID Mobile Computer market size is predicted to grow from US\$ 6099 million in 2025 to US\$ 13805 million in 2032; it is expected to grow at a CAGR of 12.4% from 2026 to 2032.

RFID Mobile Computer is a portable intelligent device that integrates RFID (Radio Frequency Identification) reading and writing capabilities with mobile computing functions. It enables contactless identification, data capture, processing, and wireless transmission of RFID tags. Typically equipped with an operating system (such as Android), wireless connectivity (Wi-Fi/4G/5G), and optional barcode scanning, it is widely used in logistics, retail, manufacturing, and asset management applications. In 2025, global RFID mobile computer production reached approximately 4,988,000 units, with an average global market price of around US\$1,250 per unit. Annual production capacity is 5,500,000 units. Gross Profit Margin: 28%. The RFID mobile computer industry chain is well-structured and vertically integrated. Upstream mainly includes semiconductor chips, RFID modules, rugged enclosures, and display/touchscreen components. Midstream focuses on system integration, rugged mobile computer assembly, and firmware/software development for Android or proprietary OS platforms. Downstream comprises logistics, warehousing, retail, healthcare, and manufacturing sectors that adopt these devices for inventory management, asset tracking, and process automation. Core manufacturers such as Zebra, Honeywell, Chainway, and UROVO dominate the midstream, leveraging proprietary hardware design and software ecosystems, while smaller OEMs supply regional markets. RFID mobile computers are becoming essential enterprise tools, especially in logistics, retail, and healthcare. The trend toward high-speed wireless connectivity, Android-based platforms, and ruggedization enables widespread adoption. I see opportunities for manufacturers to differentiate through device ergonomics, battery life, and integrated software solutions.

Additionally, mid-size manufacturers from China, like Chainway and UROVO, are rapidly gaining global competitiveness, indicating a shift in the market landscape where innovation, local support, and cost-effectiveness are critical.

United States market for RFID Mobile Computer is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.
