Riding breeches are specialized pants worn by equestrians, primarily horse riders. These pants are designed to provide comfort, flexibility, and grip while riding a horse. Riding breeches are typically made from a stretchy and durable fabric that allows for ease of movement, especially in the saddle.

Key features of riding breeches include a reinforced inner leg to prevent chafing from the saddle, a close-fitting design to reduce friction and minimize interference with the rider's position, and knee patches or full-seat grips made of materials like suede or silicone to enhance grip and stability in the saddle. Riders often wear tall riding boots or half chaps with riding breeches to create a seamless and secure connection with the horse. Riding breeches come in various styles, including full-seat breeches, knee-patch
