The global Rigid Foam Polyurethane market size is predicted to grow from US\$ million in 2025 to US\$ million in 2032; it is expected to grow at a CAGR of %from 2026 to 2032.

Flexible polyurethane foam, also known as flexible polyurethane foam or polyurethane soft foam (Flexible Polyurethane Foam, referred to as polyurethane soft foam), is a type of flexible polyurethane foam with obvious elasticity. Soft polyurethane foam is a sub-category of polyurethane products. It uses polyurethane as the main raw material and is processed through a specific production process. It is the largest polyurethane product and is widely used in many fields.

Rigid polyurethane foam is widely used in the construction field, such as wall insulation and roof insulation. Its excellent thermal insulation performance helps to reduce the energy consumption of buildings and improve energy efficiency. In the home appliance manufacturing industry, rigid polyurethane foam is used to make the insulation layer of home appliances such as refrigerators and washing machines to keep the product temperature stable and improve energy efficiency. Rigid polyurethane foam is also widely used in packaging, automobiles, aviation and other fields to meet the needs of different industries for high-performance materials. The rigid polyurethane foam market has maintained steady growth worldwide, mainly due to its wide application and increasing demand in the fields of construction and home appliances. In the future, the rigid polyurethane foam market is expected to continue to grow.
