The global Rigid Mining Truck Diesel Engine market size is predicted to grow from US\$ 1372 million in 2025 to US\$ 1840 million in 2032; it is expected to grow at a CAGR of 4.3% from 2026 to 2032.

Rigid mining truck diesel engines are ultra-high-power industrial diesel power units specifically designed for rigid mining dump trucks. They are primarily used in heavy-duty transportation scenarios in open-pit mines, typically employing a large-displacement V-type multi-cylinder structure (such as V12, V16, or even V20). Through turbocharging and high-pressure common rail technology, they output extremely high torque at low speeds and possess the capability for long-term continuous high-load operation. These engines generally have power outputs ranging from 1500 to over 4000 horsepower and are often combined with diesel-electric drive systems. The generator drives the motor, which in turn drives the wheels, meeting the high reliability requirements of long-slope transportation, high-intensity operations, and harsh environments in mines. They are the core power source for ultra-large mining trucks. In 2025, sales of rigid mining truck engines exceeded 3600 units. The price of rigid mining truck engines generally exhibits characteristics of high value, strong stratification, and significant increase with power: the price of small and medium power models is usually around tens of thousands to two hundred thousand US dollars, while the price of medium and high power engines used in mainstream rigid mining trucks is mostly in the range of 200,000 to 600,000 US dollars; for engines used in ultra-large mining trucks (more than 3,000 to 4,000 horsepower), the price often reaches 600,000 to 1 million US dollars or even higher.

United States market for Rigid Mining Truck Diesel Engine is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.

China market for Rigid Mining Truck Diesel Engine is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.
