Rigid plate vertical continuous electroplating equipment is a kind of equipment for electroplating rigid plates. Rigid plates usually refer to metal plates, such as copper plates, aluminum plates, steel plates, etc. Vertical continuous electroplating equipment means that during the electroplating process, the rigid plate continuously passes through the electroplating tank in the vertical direction to complete the electroplating process. Rigid board vertical continuous electroplating equipment usually consists of the

following main parts: 1. Plating tank: The electroplating tank is the core part of rigid board vertical continuous electroplating equipment. It is a tank containing the electroplating solution. By controlling the composition and parameters of the electroplating solution, the electroplating of rigid plates is realized. 2. Power system: The power system provides current and voltage to generate the required electrochemical reactions during the electroplating process. Usually a DC power supply or a pulse power supply is used. 3. Conveying system: The conveying system is used to continuously feed the rigid plate into the electroplating tank in the vertical direction, and take it out after the electroplating is completed. Conveyor systems usually take the form of conveyor belts, rollers or grippers to ensure stable transfer and positioning of rigid panels. 4. Control system: The control system is used to monitor and control the entire electroplating process. It can monitor the temperature, concentration, flow rate and other parameters of the electroplating solution in real time, and automatically adjust the electroplating conditions according to the set process requirements. Rigid plate vertical continuous electroplating equipment is widely used in electronics, communications, automobiles, aerospace and other industries to produce various electronic components, circuit boards, metal parts and other products. It is efficient, precise, and stable, enabling uniform and consistent electroplating of rigid panels.
