The global Ring Diamond Wire market size is predicted to grow from US\$ million in 2025 to US\$ million in 2032; it is expected to grow at a CAGR of %from 2026 to 2032.

Diamond wire is the abbreviation of diamond cutting wire. It is a linear cutting tool of super-hard materials made by using electroplated metal (usually nickel) as a binding agent and bonding diamond abrasives to the core wire matrix through metal electrodeposition. Diamond wire is widely used to cut various metal and non-metal composite materials. It is widely used in cutting silicon wafers in the photovoltaic and IT fields, especially in silicon ingot squaring. Now using circular diamond wires, high-speed cutting is possible.

The penetration rate of diamond wire cutting in the photovoltaic industry is close to 100%. Although the advantages of diamond wire cutting are obvious, in the early stage, the technology was monopolized by Japan, and the product price was high, so it was not used on a large scale in China. After the localization and large-scale production of diamond wire in 2015, product prices dropped rapidly, and the market penetration rate of monocrystalline silicon diamond wire slices continued to rise. However, polycrystalline silicon slices have problems such as shallow damage layer on the surface of the silicon wafer and high reflectivity. After being made into batteries, The efficiency is nearly 0.4% lower than that of mortar cutting silicon wafers. In 2017, with the emergence of new technologies such as black silicon and additives, the problem of excessive reflectivity of diamond wire cutting polysilicon wafers was solved. Diamond wire cutting technology has also begun to be widely used in the field of photovoltaic polysilicon material cutting. In recent years, major domestic diamond wire manufacturers have continued to optimize their processes and expand their scale, and prices have continued to fall. At present, the price of diamond wire for silicon slicing has further dropped to about 36-37 yuan/km, and the mainstream busbar wire diameter is 35-40?m.
