Rinse off mask is a facial skin care product used for treating and nourishing the skin. It typically comes in a paste or cream form, containing various ingredients such as moisturizers, whitening agents, exfoliants, or skin-tightening components. When used, the mask is evenly applied to the facial skin and left for a period of time before being rinsed off with water. The rinse off mask boasts ease of use, easy rinsing, and good skin absorption. It can provide the skin with rich nutrients and moisture in a short period of time, improving skin texture and making the skin smoother, finer, and more elastic. Additionally, depending on different skin types and care needs, the rinse off mask offers a variety of ingredients and functionalities to meet individual skin care requirements.

United States market for Rinse Off Mask is estimated to increase from US$ million in 2025 to US$ million by 2032, at a CAGR of % from 2026 through 2032.
