## Abstracts

The global Robot Thermal Management Module market size is predicted to grow from US\$ 1796 million in 2025 to US\$ 4784 million in 2032; it is expected to grow at a CAGR of 8.9% from 2026 to 2032.

A Robot Thermal Management Module is a specialized system designed to regulate and control the temperature of a robot's key components, such as motors, sensors, CPUs, and power electronics. Its main purpose is to prevent overheating, maintain operational efficiency, and extend the robot's lifespan. These modules can use active cooling (fans, liquid cooling) or passive methods (heat sinks, thermal pads, phase change materials) depending on the robot's power density and operational environment. In 2025, global Robot Thermal Management Module production reached approximately 12.24 M units, with an average global market price of around US\$ 150 per unit. Annual production capacity is 15.39 M units. Gross Profit Margin: 18.46%. The industry chain of robot thermal management modules starts with upstream raw materials, including metals like aluminum and copper, thermal interface materials, and electronic components. The midstream consists of manufacturers who design and produce the thermal modules, such as heat sinks, liquid cooling systems, and integrated thermal solutions. Finally, the downstream includes robotics OEMs and system integrators across industrial, service, and autonomous robots, who incorporate these modules to ensure reliable performance and prevent overheating. With the rapid growth of robotics in industrial automation, autonomous vehicles, and service sectors, robot thermal management modules are becoming a critical enabler for high-performance and reliable operations. Advanced solutions like liquid cooling and hybrid cooling are increasingly adopted for high-power robots, while compact and lightweight designs are vital for drones and mobile robots. Companies investing in innovative thermal management technologies are likely to gain a competitive edge as robots become more

integrated into diverse environments.
