Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

A Robotaxi is an autonomous car (SAE Level 4 or 5) operated for an e-hailing (on-demand mobility) service. The fact of eliminating the need for a human chauffeur, which represents a significant part of the operating costs of that type of services, could make it a very affordable solution for the customers and accelerate the spreading of Transportation-as-a-Service (TaaS) solutions as opposed to individual car ownership. However, it raises the issue of job destruction.

According to this study, the global Robotaxi market size will reach US\$ million by 2029.
