The global Robotic Joint Seals (IP67-69) market size is predicted to grow from US\$ 807 million in 2025 to US\$ 2281 million in 2032; it is expected to grow at a CAGR of 16.3% from 2026 to 2032.

Robotic joint seals are specialized components which are designed to maintain the integrity of joints within robotic systems. These robotic joint seals, particularly those conforming to IP67-69 standards, serve the crucial function of preventing the ingress of contaminants such as moisture, dust, and debris into the delicate mechanism of robotic joints, by forming a barrier around the joint interfaces, these seals help to protect internal components from damage and ensure smooth and reliable operation of the robot over time. Furthermore, these seals prevent lubricant from leaking out joints, ensuring proper lubrication and extending the lifespan of the joint component.

Increasing demand for robots attracting significant investments in the robotics sector. The International Federation of Robotics (IFR) announced that the increasing demand for robots is due to investments in new car manufacturing plants and the modernization of industrial facilities. For instance, in August 2022, Hyundai Motor Group announced to invest USD 400 million in establishing the Boston Dynamics AI Institute to advance AI and robotics. The company's goal is to make fundamental advances in artificial intelligence (AI), robotics, and intelligent machines. Robots have been fused into manufacturing processes to increase productivity and improve the quality of vehicles. For instance, the Ford Sanand plant has 453 robots on the shop floor, with up to 90% of the work automated. Furthermore, Robots started taking over various tasks previously performed by humans at car manufacturing plants in India. The Robotics market, worldwide, is expected to witness a significant growth in revenue, reaching a projected value of US\$42.82bn by the year 2024. Among the different segments within the

market, Service robotics is anticipated to dominate with a projected market volume of US\$33.50bn in the same year.
