The global Robotics Insurance market size is predicted to grow from US\$ 147 million in 2025 to US\$ 727 million in 2032; it is expected to grow at a CAGR of 25.8% from 2026 to 2032.

Robotics insurance is a specialized insurance product that provides coverage for potential losses to machinery and equipment during operation, as well as damage to third parties that may result from their use. It covers not only property damage to the robot itself caused by accidents, damage, malfunctions, or disasters, but also liability for personal injury or property damage to third parties during operation, and losses from security incidents caused by cyberattacks on the robot system. It is an important risk management tool for automation and intelligent equipment companies. Robotics insurance helps companies transform technical failures, operational interruptions, and liability risks into known and controllable insurance costs when robots are widely deployed in manufacturing, logistics, service, and healthcare applications. The global robotics insurance gross margin is projected to be approximately 25%-40% in 2025.

With the widespread application of robotics technology in manufacturing, logistics, healthcare, and service industries, robot insurance, as a supporting risk management tool for the industry, is experiencing a market boom. Traditional equipment property insurance and general liability insurance are insufficient to cover the complex risks arising in robot operations, such as AI decision-making failures, software malfunctions, cybersecurity incidents, and physical damage. This is driving insurance institutions to develop more specialized and segmented robot insurance product systems. Leading global insurance companies and specialized insurance solution providers are continuously launching innovative insurance products such as robot body loss insurance, third-party liability insurance, cybersecurity insurance, and R&D insurance to

help companies cope with the uncertainties in robot deployment. Robot insurance is gradually evolving from a niche experimental product into an indispensable part of the robot industry chain. Despite the broad prospects of the robot insurance market, its development still faces many challenges. First, insufficient accumulation of robot accident data makes actuarial calculations and pricing difficult, making it difficult for insurance companies to accurately assess risk exposure and payout probabilities, which also restricts the promotion of robot insurance products. Second, the definition of liability in insurance contracts is complex, involving the sharing of responsibilities among hardware manufacturers, software developers, and operators, requiring clear standards for liability division in the legal and regulatory framework. In addition, the rapid iteration of robot technology also leads to a lag in insurance product updates, resulting in problems such as difficulty in product adaptation and insufficient coverage. As enterprises strengthen their awareness of strategic risk management in automation, the demand for robot insurance continues to expand. The manufacturing and logistics industries are leading the way in robot insurance applications, particularly in scenarios with a large number of robots and continuous production tasks, where insurance can mitigate significant losses caused by malfunctions. The service and healthcare sectors are also seeing rising demand for robot operation safety and third-party liability insurance. Taking the Chinese market as an example, several insurance institutions have launched insurance products specifically designed for humanoid robots, achieving innovative forms with flexible coverage periods and comprehensive coverage. Furthermore, the deep integration of insurance products with industry services such as robot leasing and financial leasing has also promoted increased insurance penetration. The robot insurance market is at a critical stage of transitioning from pilot exploration to commercial-scale development. It is expected that in the next few years, with the continued increase in the number of automation deployments and the improvement of the insurance product system, robot insurance will become an important part of the robot ecosystem, helping enterprises achieve both risk control and business growth in highly automated operations.

For current application scenarios, robot-related insurance products mainly cover property insurance and machine breakdown insurance, which protect against hardware damage to the robot itself caused by accidents, external forces, or internal defects; third-party liability insurance and product liability insurance, which cover legal compensation liability for damages caused to others' persons or property during robot operation; in addition, there are also cybersecurity insurance, data liability insurance, and business interruption insurance. Industry experts say that with the development of the embodied intelligent robot industry, related financial products should be included in the top-level design, encouraging insurance institutions to develop related products, encouraging

industry-finance integration, and improving risk management in innovative fields. Embodied intelligent robots are rapidly integrating into various industries, but their insurance needs have long faced three major challenges: first, the core technology data is highly confidential, making it difficult for insurance companies to accurately assess risks; second, most robot manufacturers are in their early stages, and traditional insurance service models are difficult to match their flexible needs and cost considerations; and third, moral hazard prevention is difficult under the single-device ownership model. These factors have led to a mismatch between supply and demand for insurance services in the embodied intelligent robot industry, and insurance faces bottlenecks in product innovation and market implementation.

LPI (LP Information)' newest research report, the “Robotics Insurance Industry Forecast” looks at past sales and reviews total world Robotics Insurance sales in 2025, providing a comprehensive analysis by region and market sector of projected Robotics Insurance sales for 2026 through 2032. With Robotics Insurance sales broken down by region, market sector and sub-sector, this report provides a detailed analysis in US\$ millions of the world Robotics Insurance industry.

This Insight Report provides a comprehensive analysis of the global Robotics Insurance landscape and highlights key trends related to product segmentation, company formation, revenue, and market share, latest development, and M&A activity. This report also analyses the strategies of leading global companies with a focus on Robotics Insurance portfolios and capabilities, market entry strategies, market positions, and geographic footprints, to better understand these firms' unique position in an accelerating global Robotics Insurance market.

This Insight Report evaluates the key market trends, drivers, and affecting factors shaping the global outlook for Robotics Insurance and breaks down the forecast by Type, by Application, geography, and market size to highlight emerging pockets of opportunity. With a transparent methodology based on hundreds of bottom-up qualitative and quantitative market inputs, this study forecast offers a highly nuanced view of the current state and future trajectory in the global Robotics Insurance.

This report presents a comprehensive overview, market shares, and growth opportunities of Robotics Insurance market by product type, application, key players and key regions and countries.

1 SCOPE OF THE REPORT

- 1.1 Market Introduction
- 1.2 Years Considered
- 1.3 Research Objectives
- 1.4 Market Research Methodology
- 1.5 Research Process and Data Source
- 1.6 Economic Indicators
- 1.7 Currency Considered
- 1.8 Market Estimation Caveats

2 EXECUTIVE SUMMARY

2.1 World Market Overview

- 2.1.1 Global Robotics Insurance Market Size (2021-2032)
- 2.1.2 Robotics Insurance Market Size CAGR by Region (2021 VS 2025 VS 2032)
- 2.1.3 World Current & Future Analysis for Robotics Insurance by Country/Region (2021, 2025 & 2032)

2.2 Robotics Insurance Segment by Type

- 2.2.1 Property Damage Insurance
- 2.2.2 Third-Party Liability Insurance
- 2.2.3 Cyber Liability Insurance
- 2.2.4 Research and Development Insurance
- 2.2.5 Others
- 2.2.6 Robotics Insurance Market Size by Type
 - 2.2.6.1 Robotics Insurance Market Size CAGR by Type (2021 VS 2025 VS 2032)
 - 2.2.6.2 Global Robotics Insurance Market Size Market Share by Type (2021-2026)

2.3 Robotics Insurance Segment by Robots

- 2.3.1 Industrial Robots
- 2.3.2 Service Robots
- 2.3.3 Medical Robots
- 2.3.4 Autonomous Vehicles/Systems
- 2.3.5 Others
- 2.3.6 Robotics Insurance Market Size by Robots
 - 2.3.6.1 Robotics Insurance Market Size CAGR by Robots (2021 VS 2025 VS 2032)
 - 2.3.6.2 Global Robotics Insurance Market Size Market Share by Robots (2021-2026)

2.4 Robotics Insurance Segment by Sales

- 2.4.1 Direct Underwriting
- 2.4.2 Brokers
- 2.4.3 Online Platforms
- 2.4.4 Others
- 2.4.5 Robotics Insurance Market Size by Sales
 - 2.4.5.1 Robotics Insurance Market Size CAGR by Sales (2021 VS 2025 VS 2032)
 - 2.4.5.2 Global Robotics Insurance Market Size Market Share by Sales (2021-2026)
- 2.5 Robotics Insurance Segment by Application
 - 2.5.1 Robot Manufacturers
 - 2.5.2 Robot Rental Companies
 - 2.5.3 Robot Operators
 - 2.5.4 Others
 - 2.5.5 Robotics Insurance Market Size by Application
 - 2.5.5.1 Robotics Insurance Market Size CAGR by Application (2021 VS 2025 VS 2032)
 - 2.5.5.2 Global Robotics Insurance Market Size Market Share by Application (2021-2026)

3 ROBOTICS INSURANCE MARKET SIZE BY PLAYER

- 3.1 Robotics Insurance Market Size Market Share by Player
 - 3.1.1 Global Robotics Insurance Revenue by Player (2021-2026)
 - 3.1.2 Global Robotics Insurance Revenue Market Share by Player (2021-2026)
- 3.2 Global Robotics Insurance Key Players Head office and Products Offered
- 3.3 Market Concentration Rate Analysis
 - 3.3.1 Competition Landscape Analysis
 - 3.3.2 Concentration Ratio (CR3, CR5 and CR10) & (2024-2026)
- 3.4 New Products and Potential Entrants
- 3.5 Mergers & Acquisitions, Expansion
