According to our LPI (LP Information) latest study, the global Rodent Brain Matrices market size was valued at US\$ million in 2023. With growing demand in downstream market, the Rodent Brain Matrices is forecast to a readjusted size of US\$ million by 2030 with a CAGR of % during review period.

The research report highlights the growth potential of the global Rodent Brain Matrices market. Rodent Brain Matrices are expected to show stable growth in the future market. However, product differentiation, reducing costs, and supply chain optimization remain crucial for the widespread adoption of Rodent Brain Matrices. Market players need to invest in research and development, forge strategic partnerships, and align their offerings with evolving consumer preferences to capitalize on the immense opportunities presented by the Rodent Brain Matrices market.

These rodent brain matrices aid in the dissection of discrete regions of a rodent brain or comparably sized organ. They allow the investigator to slice repeatable sagittal sections of the sample, enabling precise blocking prior to microtome sectioning and the removal of small, reproducible brain regions (i.e. discrete terminal fields or nuclei) for biochemical analysis.

According to Our PET Supplies Research Center, the global pet industry reached \$ 261 billion in 2022, a year-on-year increase of 11.3%. The United States gains the highest pet penetration rate and becomes the largest pet market. According to the American Pet Products Association (APPA), 66% of American households keep pets, and the total industry sales was about US\$136.8 billion, an increase of 10.8% over 2021. According

to IVH, the German pet products industry association, the number of pets in Germany reached 33.4 million in 2022, with a total turnover of nearly ?6.5 billion. The 2023 China Pet Industry Trend Insight White Paper released by JD shows that the market size of the four major pet physical commodities is increasing year by year: pet supplies account for 45%, pet staple food accounts for nearly 35%, pet snacks account for 12%, and pet medicine and health care account for 189%.
