A roof cargo basket, also known as a roof cargo carrier, is an outdoor accessory mounted on the roof of a vehicle to increase its cargo capacity. It conveniently allows for the loading and securing of bulky or irregularly shaped items. It is typically used to transport items that cannot be easily or conveniently fit inside the car, such as skis, surfboards, and other large or elongated objects. Due to the absence of a top cover, the cargo basket imposes fewer restrictions on the shape of the items placed inside. To ensure stable driving, it can be used with elastic cargo nets.
