The global Roofshield Breather Membrane market size is predicted to grow from US\$ 1140 million in 2025 to US\$ 1882 million in 2032; it is expected to grow at a CAGR of 7.6% from 2026 to 2032.

Breather membranes are installed to the outer side of the insulation – for example, either over or under the counter-battens on a pitched roof – and allow water vapour to escape from inside a building without the need for ventilation. They also repel any water, most commonly rain, that tries to enter the building.

Materials used in buildings are collectively known as building materials, which can be divided into structural materials, decorative materials and specialized materials. Structural materials include wood, bamboo, stone, cement, concrete, metal, masonry, ceramics, glass, engineering plastics, composites, etc.; decorative materials include a variety of coatings, paints, plating, veneers, various colors of ceramic tiles, glass with special effects, etc.; special materials are used for waterproofing, moisture-proofing, corrosion resistance, fire prevention, fire-retardant, acoustic, thermal insulation, heat preservation, sealing and so on. The building materials industry tends to develop towards ecological building materials, with the principle of saving resources and reducing environmental pollution, and realizing the easy recovery and recycling of building materials. Therefore, the development of building materials with the improvement of the living room ecological environment and health care functions, the development of alternative production of energy-consuming, environmentally polluting, toxic and harmful to the human body of building materials is the development of ecological building materials construction strategy, the construction industry will continue to explore around the new materials. New building materials include a wide range of thermal insulation materials, heat insulation materials, high-strength materials

and materials that breathe, etc. In 2022, the global green building materials market will be about 312.5 billion U.S. dollars.
