Rotary Scroll Air Compressor are one of the best compressor type in rotary compressors. The air is compressed using two spiral elements. One element is stationary and the other one moves in small eccentric circles inside the spiral. Air gets trapped inside the spiral way of that element and get transported in small air-pockets to the center of the spiral.

In Rotary Scroll Air Compressor, air gets trapped at the outer edge and get compressed due to reduction of area as it travels from outer edge to inner edge. It takes about 2 to 3 turns for the air to reach the pressure output in the center.
