Rotating Lift Table is a material handling equipment that combines lifting and rotating functions. It can not only lift and lower objects vertically, but also rotate the platform horizontally, helping to achieve more flexible and efficient item handling, assembly, or processing. A rotating lifting platform usually consists of a lifting mechanism (hydraulic, pneumatic, or electric drive) and a rotating mechanism (usually electric or hydraulic drive). By combining these two functions, operators can more conveniently operate items, especially when dealing with heavy objects, large-sized items, or tasks that require precise positioning.
