RP-SMA (Reverse Polarity SubMiniature version A) connector is a kind of RF coaxial connector. It is similar in appearance to the standard SMA connector, but its polarity is opposite. In the standard SMA connector, the center pin is exposed, while the center pin of the RP-SMA connector is concave, and the nut of its external thread is also opposite to that of the standard SMA. This design is mainly used to prevent misconnection with standard SMA connectors, thereby enhancing the security and reliability of the system. It is widely applied in radio frequency systems such as wireless communication equipment, base stations, and routers that require the prevention of misconnection.
