Recycled Polyethylene Terephthalate (RPET) is simply a plastic made from repurposed waste PET from businesses and consumers. It's also the material used most commonly by manufacturers to help meet their sustainability goals. Because PET is so widely recyclable, bottles, food packages and other PET containers are taken and repurposed to create RPET, PCR and other plastics that can be used to make new products without damaging ecosystems and ending up in landfill sites. rPET meets food-grade standards and can be widely used in food and beverage packaging.
