Abstracts

The global Rubber Boat Rental Service market size is predicted to grow from US\$ 1069 million in 2025 to US\$ 1696 million in 2032; it is expected to grow at a CAGR of 7.0% from 2026 to 2032.

As a light, flexible and easy-to-operate water transportation tool, rubber boats are widely used in various water environments, such as lakes, rivers, and coastal areas of the ocean. The rental service not only meets customers' needs for water activities, but also reduces the high cost and maintenance fees required for them to directly purchase rubber boats.

The growth of the rubber boat rental service market is mainly driven by the increasing popularity of water leisure tourism and outdoor adventure activities, the increasing demand of consumers for low-cost water sports experience, and the preference of scenic spots, clubs and event organizers for light asset operation models. Individual tourists can enjoy activities like rowing and rafting at a low cost through rentals, while businesses can flexibly respond to seasonal demand fluctuations without incurring high purchase and maintenance costs. This has driven the popularity of this service in tourist destinations and urban leisure settings.
