The global S-band Duplexer market size is predicted to grow from US\$ million in 2025 to US\$ million in 2032; it is expected to grow at a CAGR of % from 2026 to 2032.

A duplexer, also known as an antenna duplexer, can be regarded as a relatively special bidirectional three-terminal filter. Duplexers are mainly used in FDD (Frequency Division Duplex) format channels on mobile phone motherboards. Their function is to isolate transmitting and receiving signals to ensure that both receiving and transmitting can work normally at the same time. A duplexer can be called a ?Duplexer? or a ?Diplexer?, but the former represents the function of transmitting and receiving isolation, while the latter represents the function of multi-band frequency band switching.
