These stations are designed to provide a controlled and dust-free environment for emptying the contents of sacks. They often feature an integrated dust extraction system to minimize dust exposure for workers, as well as containment measures to prevent the release of dust or particulates into the environment.Sack tip stations may also include features such as vibratory feeders, bag massagers or agitators to aid in the emptying process, as well as safety interlocks to ensure safe operation. They are commonly used in industries such as food processing, pharmaceuticals, chemicals, and agriculture, where the efficient and hygienic handling of bulk materials is essential.
