Sailing trousers, also known as salopettes, are specialized clothing worn by sailors during their time at sea. These trousers serve to protect sailors from water, wind, and adverse weather conditions. Key features of good sailing pants include water resistance, quick-drying properties, and durability. While they don't need to be completely waterproof like PVC foulies, a quality pair will shed water effectively. Materials like nylon, polyester, and soft-shell fabrics strike a balance between water resistance and comfort. Look for articulated knees for mobility and ankle closures to keep out spray.

The global Sailing Trousers market size is projected to grow from US\$ million in 2024 to US\$ million in 2030; it is expected to grow at a CAGR of %from 2024 to 2030.
