Sambucus Nigra is a bush or small tree that can reach up to 11m in height. The flowers develop strongly smelling yellow umbels that later develop dark red to black, strongly coloring berries. Sambucus Nigra Oil has a high content of polyunsaturated alpha linolenic acid. Sambucus Nigra Oil is a good cooking oil and is used for refining salads and raw vegetables. Due to its high content of polyunsaturated fatty acids it is not suitable for frying.

In cosmetics Sambucus Nigra Oil is mainly used for skin regeneration and for treating fatty, dirty, acne-prone skin. Elderberry seed oil makes the skin soft, smooth and stabilizes the lipid coating of the skin.
