The pumps are twin-screw pumps with a hygienic design for the food, dairy, beverage and cosmetic industries. The flow is homogeneous and takes place in the axial direction, so that there is no change in the volume or physical properties of the product. Therefore, it is the ideal pump for handling shear-sensitive fluids. It has a high suction lift capacity with a very low NPSH value. It is capable of pumping high viscosity but low viscosity fluids and therefore can be used as a CIP supply pump. The design ensures adequate cleanliness and drainage.
