A Sawdust Briquette Machine is a type of briquetting machine specifically designed to compress sawdust into cylindrical or rectangular briquettes. These briquettes can be used as fuel or for various other applications in industries such as cooking, heating, and biomass power generation. Sawdust briquette machines come in various types and sizes, ranging from small-scale manual machines suitable for household or small business use to large industrial machines capable of continuous operation and high production output. These machines provide a sustainable and eco-friendly solution for utilizing sawdust, which is often considered a waste product in wood processing industries. By compressing sawdust into briquettes, these machines help reduce waste, save on storage and transportation costs, and provide an efficient alternative fuel source for various applications.

The global Sawdust Briquette Machine market size is projected to grow from US\$ million in 2024 to US\$ million in 2030; it is expected to grow at a CAGR of % from 2024 to 2030.
