Screen Printed Glass is a clear or tinted float glass, which has been printed with ceramic ink designs and subsequently toughened, a process which also fires ceramic paint into the glass surface.Screen Printed Glass is available in wide range of colours and designs that fully or partially cover the surface of the glass.It gives strength, safety, privacy, decoration and solar control in one product. Ceramic coverage on the screen printed glass helps to control heat and light transmission. The shading coefficient of clear and body tinted glass is reduced, thus allowing greater flexibility of choice and design.
