The global Screen Printing Mesh for Electronic market size is predicted to grow from US\$ 364 million in 2025 to US\$ 543 million in 2032; it is expected to grow at a CAGR of 6.0% from 2026 to 2032.

In 2025, global Screen Printing Mesh for Electronic production reached approximately 15,500 K Sqm with an average global market price of around US\$ 24 per Sqm, and a gross profit margin of approximately 10%-30%. Screen Printing Mesh for Electronics refers to precision screen fabrics used to deposit functional pastes and inks on electronic substrates with tight line width, thickness control, and repeatability. It is commonly made from high-modulus polyester monofilament, stainless steel, or hybrid meshes, selected based on dimensional stability, solvent resistance, and aperture uniformity. These meshes enable printing of conductive silver and carbon inks, dielectric layers, solder masks, thick-film circuits, sensor electrodes, and component markings on substrates such as ceramics, glass, PET films, and PCBs. Key requirements include high tension retention, low elongation, uniform weave, controlled open area, minimal contamination, and compatibility with photoemulsions and cleaning processes to ensure stable registration and consistent paste release in high-volume electronics manufacturing.

The industrial chain of Screen Printing Mesh for Electronics includes upstream materials such as polymer chips or stainless wire, spinning and weaving auxiliaries, and surface treatment chemicals. Midstream production covers filament drawing and heat-setting, precision weaving, cleaning and surface treatment, inspection and grading, and roll cutting/packaging. Downstream users include electronics printing and thick-film process lines for PCB, sensors, membrane switches, MLCC-related printing, and other functional layer deposition. Supporting services include mesh pretensioning, screen

stretching, calibration support, and process guidance to maintain print accuracy and yield.

United States market for Screen Printing Mesh for Electronic is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.
