Screen printing is a printing technique where a mesh is used to transfer ink (or dye) onto a substrate, except in areas made impermeable to the ink by a blocking stencil. Screen printing plates, also known as screens or stencils, are essential components used in the screen printing process. These plates consist of a mesh stretched over a frame, with a stencil of the desired image or design adhered to the mesh. The mesh material can vary in terms of mesh count (threads per inch) and material type, such as polyester, nylon, or stainless steel, depending on the specific application and printing requirements.
